

## Purpose of the Map

We created this map with the hope that more people will get to know about Ogijima. This island is full of charm, and we want visitors to explore as many spots as possible and navigate the island smoothly.

This version is an improved edition of a previous map. We've added essential information such as restroom locations, vending machines, estimated travel times between spots, and areas that require caution while sightseeing, with accessibility in mind. By providing a comprehensive view of the entire island, this map helps visitors understand the spatial relationships between different spots, making it easier to plan their trip.

Our goal was to create a map that enhances your experience on Ogijima. We hope it helps you discover and appreciate the island's beauty even more. Enjoy your time on Ogijima!

## What's KOKOJIKARA ?

This map was produced by OGIJIMA Project "Kokojikara". Kokojikara is a project group established in 2021 by Kagawa University students with the aim of revitalizing the local community. We operate the Ogijima Library every Saturday and Sunday, and also run a small café that serves coffee and mandarin orange juice. We hold a kids' class for Ogijima children every Sunday and enjoy interacting with them.

We also grow peanuts to produce Ogijima's specialty. As Ogijima's birthrate declines and the population ages, we, the university students, are devoting our energies to making Ogijima a vibrant place to live and work.
